PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.Sc. in Computer Science and strong foundational skills in data analysis, visualization, and database querying. Trained across 6+ modern data analytics and AI-assisted tools, with practical exposure to Python, SQL, Power BI, and MS Excel for end-to-end data handling, cleaning, and dashboard reporting. Strong analytical thinking and a fast learner, seeking an entry-level Data Analytics role to translate raw data into actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy)
Database & Querying: SQL, Relational Database Design, Data Integration
Data Analytics & Visualization: Power BI, MS Excel, Power Apps, KNIME, Julius AI
Data Analysis Techniques: Data Cleaning, Data Matching, Query Optimization, Dashboard Reporting, Exploratory Data Analysis
Web Technologies: HTML, CSS
Version Control & Collaboration: Git, GitHub
AI & Automation Tools: Claude, Julius AI, Bricks, Quadratic AI, Zebra AI, Antigravity, Generative AI Workflows

CERTIFICATIONS & TRAINING

Generative AI & Data Analytics Tools Training 2026

- Completed hands-on training in Python, SQL, MS Excel, and Power BI for data handling, cleaning, reporting, and dashboard creation; also trained in KNIME for data workflow automation.
- Built practical experience across 5+ Generative AI and productivity tools, including Claude, Julius AI, Bricks, Quadratic AI, and Zebra AI, for AI-assisted data analysis tasks.

PROJECTS

Student Analytics Dashboard 2026

Data Analytics & Dashboard Reporting | Excel, PostgreSQL, Power BI

- Analyzed a 5,000-record student dataset using PostgreSQL and Excel, covering academics, attendance, and fees.
- Performed class-wise, subject-wise, attendance, and pass/fail analysis to identify performance trends and grade distribution.
- Built an interactive Power BI dashboard to visualize top and bottom performing students and key academic metrics.
- Applied data cleaning and SQL-based analysis techniques to ensure accurate, reliable reporting.

E-commerce Product Recommendation & Query System 2026

Data Analysis & Query Optimization | Python (Pandas), SQL, Git/GitHub

- Analyzed and processed structured product datasets using Pandas to optimize search relevance and match user preferences.
- Applied algorithmic data-matching techniques to clean and process product attributes, improving query response accuracy.
- Queried and managed data using SQL to support efficient product search and recommendation logic.

Healthcare Data Analytics (AI-Assisted) 2026

AI-Assisted Data Analysis | Julius AI, Quadratic AI, Claude AI, Bricks AI, Zebra AI

- Leveraged Julius AI and Quadratic AI to analyze a 3,000-record healthcare dataset covering demographics, vitals, and diagnoses.
- Used Claude AI to interpret AI-generated visualizations and derive insights on admission trends and cost patterns.
- Used Bricks AI and Zebra AI to build presentation-ready reports and business-focused analytics summaries.

Additional Project — School Management LMS (Python, HTML, CSS, SQL): Built a database-driven reporting system with SQL-based record management for students and staff.

EDUCATION

B.Sc. Computer Science 2023 - 2026

Kalaigarnar Karunanidhi Government Arts College for Women (Autonomous), Pudukkottai
Percentage: 70.41%

HSC 2022 - 2023

Government Girls Higher Secondary School, Sandhaipettai, Pudukkottai
Percentage: 74.83%

INTERPERSONAL SKILLS

Skills: Self-Motivated, Hardworking, Problem Solving, Analytical Thinking, Attention to Detail
Languages: English (Professional), Tamil (Native)
